USER LEVELS ILLITERATED...
-----
LEVEL  DESCRIPTION                                RIGHTS
-----
0      UUBER                                      All of below +
                                                - cannot have his or her account
                                                modified by anyone else (assuming
                                                there is only one level 0 user).

1      Administrator                             All of below +
                                                - install packages
                                                - remove packages

2      Super-User                                All of below +
                                                - add any user
                                                - delete any user
                                                - modify any user
                                                - access to all departments
                                                regardless of selection to restrict
                                                access to only certain dept's.

3      Manager                                    All of below +
                                                - modify users in your Site

4      Supervisor                                All of below +
                                                - modify users in your Department

5      Lead Person                               All of below +
                                                - sign / certify records
                                                - modify users in your Department
                                                that are on your Shift

6      Skilled Trades                             All of below +
                                                EXCLUSIVE TO Skilled Trades ONLY!
                                                - access to all departments
                                                regardless of selection to restrict
                                                access to only certain dept's.

7      Operator                                   Includes
                                                - manual record entry
                                                - machine control

In order to affect changes on a user - the person trying to make a change must be
of an access level equal to or higher (smaller number) than the user being affected.
